# Circuitree API Connection Guide

Oct 15, 2026 · @Evan Liewer

## Connecting

Circuitree runs one shared API host for every camp. Forest Home is identified by a company code inside the login call, not by a custom URL.

| What | Value |
|---|---|
| API base | `https://api.circuitree.com/` |
| Authentication call | `POST https://api.circuitree.com/Authentication/Authenticate.json` |
| Report query call | `POST https://api.circuitree.com/Exports/ExecuteQuery.json` |
| Company code for a staff token | `187` |
| Service documentation | `https://api.circuitree.com/<Service>/help` (Exports, Reporting, Registration, Accounting, Entity, Medical, Itineraries) |
| Database view schemas, no login | `https://app.circuitree.com/OLAP/main.html` |
| Admin site | `https://app.circuitree.com/FH` |

### Step 1. Get a token

You need three things: your own Circuitree staff username and password, and Forest Home's shared API Key, which Evan provides through the password manager. Post this body to the authentication call.

```
{
  "Username": "your.username",
  "Password": "your-password",
  "APIKey": "the-shared-api-key",
  "CompanyCode": "187"
}
```

A success response has `StatusCode` 1 and two values to keep: `ApiToken`, which starts with `C-`, and `CompanyAPIURL`. The token carries your login's permissions. Store it in a secrets file or password manager, never in code or chat. Re-run the call now and then because the CompanyAPIURL changes when Circuitree upgrades.

**Step 2. Send the required headers on every request**

| Header | Value | Why |
|---|---|---|
| `Content-Type` | `application/json` | Bodies are JSON |
| `User-Agent` | Any browser string, for example `Mozilla/5.0 (Macintosh; Intel Mac OS X 10_15_7) AppleWebKit/537.36 Chrome/126.0 Safari/537.36` | The firewall returns HTTP 403 with an HTML page to anything that looks like a script |

**If authentication fails**

- `StatusCode` 2, invalid username or password: the login or the API Key is wrong. The key is case-sensitive.
- HTTP 403 and no JSON: the User-Agent header is missing, or a VPN or proxy is in the way.
- A correct password that still fails: the login may have multi-factor auth enforced in the admin site. Ask Evan to check the user settings.

## Running a query

Every saved query under Reporting, then Queries in the admin site can be run over the API by its numeric ID. Post one JSON body to the report query call with the two headers above.

**Request body**

```
{
  "ApiToken": "C-your-token",
  "ExportQueryID": -107,
  "QueryParameters": [
    { "ParameterID": 7, "ParameterValue": "2026" }
  ]
}
```

- `ExportQueryID` is an integer. Negative IDs are Circuitree built-ins. Positive IDs are Forest Home's own saved queries.
- `QueryParameters` is always present. Send an empty array `[]` for a query that takes none.
- `ParameterID` is the parameter's number, never its name. `ParameterValue` is always sent as a string.

### Response shape

The rows come back double-encoded. The outer object holds a key named `Results` whose value is a JSON string, and that string is the array of row objects. Parse twice.

```
{
  "StatusCode": 1,
  "StatusMessage": "",
  "Results": "
[{\"RegistrationID\":123456,\"EventYear\":2026,\"EnrollmentDate\":\"2026-01-
14T10:22:31\"}]"
}
```

- An empty or missing `Results` means zero rows, not an error.
- Column names are whatever the saved query's SQL selects. Columns whose value is null are omitted from the row object rather than sent as null, so check for a key's presence before reading it.
- Enumerations arrive as integers, not words. Status 1 is active, for example, and RegType 1 is child, 4 is self.

### Status codes

| StatusCode | Meaning | What to do |
|---|---|---|
| 1 | Success | Parse `Results` |

| StatusCode | Meaning | What to do |
|---|---|---|
| 2 | Invalid login or API Key | Check credentials, mint a fresh token |
| 5 | System exception | Usually a bad parameter value or a query whose SQL failed. Try it in the admin site |
| 6 | Validation error | A required parameter is missing |
| 7 | Unauthorized | The token does not have rights to that query, or it expired |

An HTTP 403 with an HTML body is not a status code. It means the User-Agent header was missing.

**Size and speed**

There is no paging. A query returns every row at once. Large pulls such as the full accounts receivable ledger run to hundreds of thousands of rows and take a minute or more, so set a read timeout of at least 90 seconds and narrow by year or date window wherever the query offers a parameter. A parameter the query does not define is silently ignored, so a wrong ParameterID looks like a filter that did nothing. The catalog below lists the exact IDs each query accepts.

## Dates

Dates are plain strings in both directions with no time zone marker. Everything is Forest Home local time, which is Pacific.

**Sending a date as a parameter**

Use the ISO calendar form as a string. Circuitree parses it with .NET, so `10/14/2026` also works, but ISO avoids any month and day confusion.

| Parameter kind | Format | Example | Verified |
|---|---|---|---|
| Date parameters: Period Begin 8, Period End 9, Event Begin Date 4, Event End Date 5, As Of Date 65, Reservation Begin 109, Reservation End 220, Arrival Date 123, Departure Date 122, Earliest and Latest Enrollment Date 93 and 139, Earliest and Latest Event Begin Date 45 and 46, _Date 224 | `YYYY-MM-DD` | `"2026-06-01"` | 8 and 9 on query 483 returned 13 rows for one week and 5,193 with no window |
| Date-time parameters: _DateTime 440, _DateTime2 441, LastRunDate 503 | `YYYY-MM-DDTHH:MM:SS` | `"2026-10-14T12:00:00"` | 440 on query 546 honored the time of day. Date only, a space instead of T, and US format all parsed too |
| Year parameters: Event Year 7, Latest Event Year 19, Earliest Event Year 195, Event Year 2 241, _Year 448, Donation Year 240 | `YYYY` | `"2026"` | 7 on query -107 returned 15,359 rows for 2026 |
| Month: Month 49, _Month 310 | `M` or `MM` | `"6"` | not tested |

A window is inclusive on both ends. A time of day on a date-only parameter is ignored.

**Reading a date from a result**

Date columns come back as ISO date-time strings, `YYYY-MM-DDTHH:MM:SS`. A few columns carry fractional seconds, `YYYY-MM-DDTHH:MM:SS.fff`. Parse them as Pacific wall-clock time. Treating them as UTC shifts every arrival by seven or eight hours.

| Column pattern | Example value | Note |
|---|---|---|
| `ArrivalDateTime`, `DepartureDateTime` | `2025-07-25T17:00:00` | Guest group check-in and check-out |
| `BeginDateTime`, `EndDateTime`, `BeginDate` | `2026-06-14T15:00:00` | Event and division start and end |
| `StartDateTime`, `EndDateTime` on a reservation item | `2025-08-08T05:00:00` | Lodging and meeting space blocks |
| `EnrollmentDate`, `ActiveDate`, `EntryDate`, `ModifiedDate`, `FromDate` | `2026-10-14T00:03:47` | Record timestamps, to the second |
| `SortDate` on a ledger row | `2026-01-14T00:00:00` | Posting date, time is always midnight |
| `BirthDate` | `1964-11-01T00:00:00` | Time is always midnight |

A null date is simply absent from the row object, so a missing key means no date rather than a parse failure.

**The other date format**

The entity, medical, registration and itinerary services, as opposed to the report query call, return .NET serialized dates such as `/Date(1718000000000)/`. The number is milliseconds since 1970 UTC. You only meet this if you go beyond report queries.

**Event year versus calendar year**

Event Year, parameter 7, is the year the event runs. A registration made in November 2026 for a June 2027 camp has event year 2027. Pull the event year you care about, not the year the booking happened.

## Parameter IDs

Circuitree keeps one global list of export parameters. Each has a fixed number, and that number is the `ParameterID` you send over the API, whichever query you are running. Parameter 8 is Period Begin on every query that has a Period Begin. The admin site also shows a per-query "Query Parameter ID" in the thousands. That number is not what the API wants. Send the global number.

The parameters below are the ones that matter in practice, ranked by how many of the 720 mapped queries use them. The full list of all 365 global parameters is in the appendix.

| ParameterID | Name | Value format | Queries using it | Of which required |
|---|---|---|---|---|
| 7 | Event Year | `YYYY` | 331 | 243 |
| 89 | Event Location | location ID, blank for all | 361 | 1 |
| 8 | Period Begin | `YYYY-MM-DD` | 259 | 40 |
| 9 | Period End | `YYYY-MM-DD` | 258 | 35 |
| 90 | Event | event ID, blank for all | 201 | 2 |
| 4 | Event Begin Date | `YYYY-MM-DD` | 152 | 4 |
| 106 | Event Type | event type ID, blank for all | 132 | 1 |
| 138 | Cost Center | cost center ID, blank for all | 98 | 0 |
| 51 | Registration Status | status ID, blank for all | 93 | 0 |
| 26 | Itinerary ID | integer | 69 | 20 |
| 105 | Event Division | division ID, blank for all | 60 | 0 |
| 43 | Entity ID | integer | 59 | 16 |
| 65 | As Of Date | `YYYY-MM-DD` | 43 | 24 |
| 76 | Gender | blank for all | 39 | 0 |
| 5 | Event End Date | `YYYY-MM-DD` | 36 | 0 |
| 10 | Minimum Amount | number | 29 | 0 |
| 11 | Maximum Amount | number | 18 | 0 |
| 17 | Batch Number | integer | 24 | 9 |
| 27 | Registration ID | integer | 20 | 1 |

| ParameterID | Name | Value format | Queries using it | Of which required |
|---|---|---|---|---|
| 230 | _Boolean | `0` or `1` | 25 | 1 |
| 225 | _Text | free text, used for the email lookup | 11 | 3 |
| 223 | _Number | integer | 10 | 7 |
| 440 | _DateTime | `YYYY-MM-DDTHH:MM:SS` | 8 | 1 |
| 190 | Period Date To Use | `1` for arrival date, `2` for posting date | 29 | 29 |

Location IDs for parameter 89: Adventure Mountain 7, Creekside 8, Lakeview 9, Forest Center 10, Ojai Valley 12, Cedar Ridge 13, NDC 1006.

**Required versus optional.** A required parameter left out returns an error or zero rows depending on the query. An optional one left out means "all": most optional dropdowns default to a wildcard and most optional dates default to a wide window such as 1 January 2000 to 31 December 2099. The catalog marks required parameters and shows each default.

### Queries with no parameters

130, -24, -56, -58, -60, 377, 551 and most of the custom contract and statement queries run with an empty `QueryParameters` array and return every row.

### Queries that error without a parameter

-77, -108, -70 and -16 return StatusCode 5 or 6 when called with no parameters. Their parameter IDs have not been mapped. Check the admin site editor before using them.

### Two warnings

- Leaving out a required parameter can return zero rows rather than an error. Query 422 with only parameter 90 returns nothing for every event. It needs parameter 7 as well.
- Query 483 is capped at 50 rows on the server regardless of the window you send. Pull it one week at a time and merge.

# Forest Home custom queries

Forest Home has 407 custom queries. Positive IDs are custom. The ones below are the ones a new integration is most likely to need, with their exact API parameters. Required parameters carry an asterisk. The full list of all 407, with every parameter and default, is on the Query catalog tab.

| ID | Name | Parameters | What it returns |
|---|---|---|---|
| 483 | White Sheet All the things (with Status) | 26 Itinerary ID; 89 Event Location; 8 Period Begin; 9 Period End | Guest group itineraries arriving in the window: ItineraryID, EntityID, ProgramName, GroupName, Location, PrimaryContact, ItineraryStatus, Adults, Youth, Children, arrival and departure. With no window it returns every itinerary, about 5,200 rows. |
| 484 | Resource Reservations by itinerary with cancelled | 7 Event Year; 89; 110 Resource Type; 108 Reservation Status; 109 Reservation Begin; 220 Reservation End; 176 Resource Category; 8; 9; 26 Itinerary ID | Every reservation line on an itinerary: lodging, meeting space, capacity package, snacks, with StartDateTime, EndDateTime, Amount, Charges. |
| 486 | List of Program Events | 7* Event Year; 89; 8; 9; 138 Cost Center | Events with EventTypeID, BeginDateTime, EndDateTime. |
| 422 | Attendee Information (Simple) | 7* Event Year; 89; 106 Event Type; 90 Event; 4 Event Begin Date; 51 Registration Status; 105 Event Division | One row per attendee. |
| 552 | Attendee Information (Next 35) | same as 422, none required | Attendees for events beginning in the next 35 days. |

| ID | Name | Parameters | What it returns |
|---|---|---|---|
| 540 | Group Admin List for Events (Copy) | 7; 89; 90; 4; 106; 57 City; 58 State; 51; 81 Entity Type | Group administrators with contact details per event. |
| 541 | Group Per Event | 7; 89; 8; 9; 138; 90* Event | Groups attending one event. |
| 551 | Balances Due by itinerary (Evan) | 65* As Of Date; 190* Period Date To Use; 7; 138; 8 earliest arrival; 9 latest arrival; 26* Itinerary ID | Balance due on one itinerary as of a date. |
| 471 | Balances Due (Guest Groups) | 65* As Of Date; 190* Period Date To Use; 7; 138; 8; 9 | Balance due for every guest group as of a date. |
| 238 | entityID Lookup by email | 225* _Text | EntityID, name and email for an address. The only email search the API offers. |
| 218 | Members of Families | 43* Entity ID | Everyone bonded to a family group. |
| 216 | Entity's Family ID | 43* Entity ID | The family group an individual belongs to. |
| 219 | Entity Registrations | 43* Entity ID | All registrations for one person. |
| 108 | Itinerary Registrations | 7* Event Year; 89; 90; 106; 152 Registration Type | Registrations per itinerary for a year. |
| 130 | not in the query list | none | Runs over the API and returns one row per group per event for all years, about 58,000 rows, including cancelled. It is a hidden sub-query. |

| ID | Name | Parameters | What it returns |
|---|---|---|---|
| 128 | Discounts Given Query | 7; 89; 90; 106; 80 Event Division Type; 45 and 46 earliest and latest event begin date; 44 Discount; 51 | Discounts applied per registration. |
| 207 | Itinerary Scholarships Summary | 7* Event Year; 89; 90; 4; 92 Scholarship; 138; 12 AR Category; 106; 152 | Scholarships per registration. |
| 397 | Kyle - Enrolled Campers by Event | 7; 89; 90; 4; 5; 76 Gender; 54 and 55 min and max age; 75 Grade; 94 years attended; 113; 63; 58; 147 Online Enrollment; 106 | Enrolled campers with demographics. |
| 290 | Year over Year Group Registrations | 7* primary year; 89; 90; 106; 51; 241* comparison year; 247; 277; 236; 278 | Groups in one year compared with another. |
| 289 | Non-Returning Groups (No Families) | 7* primary year; 241* comparison year; 89; 90; 51; 247; 277; 278; 106 | Groups that came in the first year and not the second. |
| 260 | Reservations - Rebooking | 7* Event Year; 241* comparison year; 8; 9; 89 | Guest group rebooking between two years. |
| 377 | List all Resources (MCC) | none | Every bookable resource at Mill Creek with LocationID and Category, about 1,000 rows. |
| 501 | List all Resources (Ojai) | none | The same for Ojai Valley. |
| 497 | Resource Reservations by date | 7; 89; 110; 108; 109; 220; 176; 8; 9; 26 | Reservation lines in a date window across all itineraries. |
| 320 | New Itineraries Last 7 Days | 65* As Of Date; 89 | Itineraries created in the week before the date. |
| 361 | Legal Terms (who signed and when) -evan | 26* Itinerary ID | Signed terms for one itinerary. |

| ID | Name | Parameters | What it returns |
|---|---|---|---|
| 148 | Missing Medical Forms by Itinerary Evan | 7; 106; 89; 90; 4; 105; 130; 51; 311; 26* Itinerary ID | Attendees on an itinerary without a medical form. |
| 554 | Summer Injuries Analysis (Claude) | none | Raw incident rows from January 2021 with area and activity. The Area field holds body part, not location. |
| 555 | Radiant Price Counts by Event (Claude) | none | Ledger rows per registration for event type 2008 with ARCategoryNum, Description, Amount. |
| 556 | Radiant Registrations by Month (Claude) | none | EnrollmentDate, ActiveDate, OnlineEnrollment per registration for event type 2008. |

**Queries that are not in the admin list but run over the API.** A handful of IDs such as 130, -24, -99, -100 and -77 do not appear in the Reporting query list. They are sub-queries that feed reports. The API runs them anyway, and the earlier catalog built from the Reports screen gave them the wrong names. -24 returns the entire accounts receivable ledger for all years, about 861,000 rows, with RegistrationID, EntityID, EventDivisionID, ARCategoryNum, Description, Amount and SortDate.

**Event type IDs** that appear in event and division rows:

| EventTypeID | Program |
|---|---|
| 1 | Family Camp |
| 9 | Children's summer camp (Wild Rock) |
| 3019 | Youth summer camp |
| 3018, 3020 | Youth winter camp |
| 3011 | Outdoor science school |
| 2008 | Radiant (CCA) |

**Ledger category numbers** in the accounts receivable rows:

| ARCategoryNum | Meaning |
|---|---|
| 20 | Tuition |
| 19 | Discount |
| 13, 1006, 1016 | Scholarship |
| 8, 9 | Payment |
| 4 | Refund |
| 2, 3 | Cancellation fee |
| 1024 | Service fee |
| 299 | Email pack |

Price paid for a registration is tuition plus discounts, floored at zero. The StatementTransactionAmount column on a registration row is not the price.

## Built-in queries, verified

Negative IDs are Circuitree built-ins. These have been run over the API and their output checked against the query name in the Reporting list. Where a name is misleading the table says what really comes back. Required parameters carry an asterisk.

| ID | Name | Parameters | What it returns |
|---|---|---|---|
| -107 | Camper Addresses by Cabin | 7* Event Year; 89; 90; 4; 76 Gender | One row per active individual registration: RegistrationID, GroupID, GroupName, DivisionFullName, EventYear. GroupID is always populated. Individual campers get their own family group. |

| ID | Name | Parameters | What it returns |
|---|---|---|---|
| -113 | Registration Detail Export - Campers - Kyle Version | 7* Event Year; 89; 90; 105; 106; 80; 4; 51 | Registrations including cancelled, with EnrollmentStatusName, EnrollmentDate, OnlineEnrollment, EventDivisionFullName, EventType, Gender, AttendeeEmail, AttendeePhone, ItineraryEntityName and type. |
| -66 | Attendee Information | 7* Event Year; 89; 106; 90; 4; 51; 105; 152; 76 | Attendee rows with parents: FatherID, MotherID, AdminID, BillingContactID, parent names, AdminEmail, Number, CamperEmailAddress, do-not-solicit flags, BirthDate, AgeAsOfEvent, Gender. Keys are omitted when null. |
| -51 | Discounts Given | 7; 89; 90; 106; 80; 45; 46; 44; 51; 12; 156; 158 | Discounts with DiscountName, DiscountDescription, Amount per RegistrationID. ItineraryEntityID equals the family group ID. |
| -25 | Scholarships Given | 7* Event Year; 89; 90; 4; 92 Scholarship; 138; 8; 9; 51 | Scholarships with ScholarshipName per registration. |
| -24 | hidden sub-query | none | The full accounts receivable ledger, all years, about 861,000 rows: RegistrationID, EntityID, EventDivisionID, ARCategoryNum, Description, Amount, SortDate. Guest group itineraries are not in it. A RegistrationID here but absent from -107 is cancelled. |

| ID | Name | Parameters | What it returns |
|---|---|---|---|
| -5 | Statement - Individual | 26; 27; 51; 50 | Statement lines per registration, about 250,000 rows per year when run with parameter 7. |
| -17 | Camper Emails | 17; 7; 89; 65; 8; 9; 230 | Camper email addresses. |
| -56 | Email Addresses | 43; 8; 9; 186; 127; 54; 55 | Entity email dump with IsPrimary flag. |
| -58 | Entity List Export By Area | 8; 9; 59 Zip; 60 miles; 81 Entity Type | Entity names with primary email and phone. |
| -60 | Telephones | none | Entity phone dump with TelecommunicationType Cell, Home, Work. |
| -62 | Sales By Location | 251; 67; 117; 116; 8; 9 | Store sales. |
| -64 | Registrations by Month | 8; 9; 7; 89; 90; 105; 51; 106; 465 | Enrollment date per registration. |
| -90 | Registration List - Export | 7* Event Year; 106; 89; 90; 58; 57; 51; 59; 60; 8; 9; 110; 176 | Per-registration rows with EventFullName and DivisionName. History begins 2016. |
| -99 | hidden sub-query | none | Immunization records. |
| -100 | hidden sub-query | none | Medical form attribute values. Contains health information. |
| -134 | Medical Form - Medical Attributes for Year | 7* Event Year; 154 Member Type | Medical form attribute values for a year. Contains health information. |
| -123 | Registration Transfers | 7* Event Year; 8; 9 | Division transfers. |
| -132 | Posted Donations Summary | 17; 8; 9; 133; 134; 135; 4* | Donations. |
| -194 | Mass Emails sent | 8; 9 | Mail merge records. |
| -71 | Enrollment Comparison | 19* Latest Event Year; 106; 89; 80 | Enrollment counts compared across years. |

| ID | Name | Parameters | What it returns |
|---|---|---|---|
| -46 | AR Detail | 12; 8; 9; 7; 89; 138; 18; 16; 190*; 106; 43; 45; 46 | Accounts receivable detail lines. |
| -48 | Balances Due | 7*; 90; 190*; 158*; 89; 106; 10; 11; 65; 4; 5; 152; 51; 43; 105; 44 | Balances due per registration. |
| -49 | Balances Due (Itineraries) | 7; 170; 152; 89; 90; 10; 11; 65*; 190*; 123; 8; 9 | Balances due per guest group itinerary. |
| -114 | Resource Reservations | 7* Event Year; 89; 110; 108; 109; 220; 176; 8; 9 | Reservation lines across all itineraries. |
| -116 | Store Card Transactions | 7; 106; 89; 90; 4; 43; 8; 9; 67; 27 | Camp store charges by registration. |

**Telling individuals from groups.** In -107, join GroupID to the EntityID column of query 130 and read EntityTypeName. A value of Family means an individual or family camper. Church, Group, Private School and the rest mean a group camper.

**Division naming.** Children's summer camp divisions read `<year> Wild Rock - Week N - ...`. Youth summer reads `<year> Summer Camp - Week N` or `Event N`. Family Camp divisions carry no year prefix and embed the housing tier, for example `Standard - Adult` or `Premium 2-1 (The Pines)`.

## Full query catalog

Every query in the Forest Home Reporting list as of 15 October 2026: 969 in all, 407 custom and 562 built in, grouped by the category the admin site shows. The Parameters column lists each API ParameterID with its name. An asterisk marks a required parameter. A value in parentheses is the default the admin site fills in, which the API does not apply, so send it yourself if you want it. A display name differing from the parameter's global name is shown after "as". The 249 built-in queries marked "not captured" are mostly HR, payroll, staff and accounting-basis variants whose parameters were not pulled; their IDs and names are correct. The same catalog is in the file circuitree_queries.csv next to this guide.

## Custom: Accounting (117)

| ID | Name | Parameters |
|---|---|---|
| 644 | Radiant Reclass | 8* Period Begin; 9* Period End |
| 640 | Camper Days & Attendance Intacct Import | 8* Period Begin; 9* Period End |
| 639 | v5 Customized GL - For Intacct | 8* Period Begin; 9* Period End; 101 GL Batch Type |
| 638 | blank query | none |
| 636 | FH-230 - TEST - Accounting source controls | none |
| 635 | FH_CT_DW_Accounting_KeyRange | 223* _Number as Lower inclusive key; 151* Accounts Receivable ID as Upper exclusive key; 225* _Text as Extraction mode (ALL_RANGES) |
| 551 | Balances Due by itinerary (Evan) | 65* As Of Date; 190* Period Date To Use (1); 7 Event Year; 138 Cost Center; 8 Period Begin as Earliest Arrival Date (01/01/2000); 9 Period End as Latest Arrival Date (12/31/2999); 26* Itinerary ID |
| 547 | REPORTING - Program Report No Discounts Or Scholarship Columns | 7 Event Year; 89 Event Location; 8 Period Begin (1/1/2000); 9 Period End (12/31/2099); 138 Cost Center |
| 543 | v4 Customized GL - For Intacct | none |
| 542 | v4 Customized GL - For Intacct | 8* Period Begin (12/01/2025); 9* Period End (12/31/2025); 228 GL Batch Type |
| 541 | Group Per Event | 7 Event Year; 89 Event Location; 8 Period Begin (1/1/2000); 9 Period End (12/31/2099); 138 Cost Center; 90* Event (6109) |
| 519 | Registration_Event_Map | none |

| ID | Name | Parameters |
|---|---|---|
| 518 | REPORTING - Family Camp Report No Discounts Or Scholarship Columns | 7 Event Year; 89 Event Location; 8 Period Begin (1/1/2000); 9 Period End (12/31/2099); 138 Cost Center |

# Appendix: every export parameter

The complete global parameter list as the admin site offers it when adding a parameter to a query, captured 15 October 2026. The number is the API `ParameterID`. Most are only meaningful to a query whose SQL references them.

| ID | Name | ID | Name | ID | Name |
